## Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

the amendment

the 11/12/04

## **Listing of Claims:**

- 1. (Currently Amended) A method of delivery to the pulmonary system comprising: administering to the respiratory tract of a patient in need of treatment, prophylaxis or diagnosis an effective amount of a dry powder comprising:
- a) a multivalent metal cation which is complexed with a therapeutic, prophylactic or diagnostic agent;
- b) a pharmaceutically acceptable carrier; and
- optionally, a multivalent metal cation-containing component wherein, the c) dry powder is spray-dried and has a total amount of multivalent metal cation which is more than about 1% w/w of the total weight of the agent, a tap density of less than about 0.4 g/cm<sup>3</sup>, a median geometric diameter of from between about 5 micrometers and about 30 micrometers and an aerodynamic diameter of from about 1 to about 5 microns.
- 2. (Original) The method of Claim 1, wherein the biologically active agent is a protein.
- (Original) The method of Claim 2, wherein the protein is insulin. 3.
- 4. (Original) The method of Claim 2, wherein the multivalent metal cation is selected from Zn(II), Ca(II), Cu(II), Ni(II), Co(II), Fe(II), Ag(II), Mn(II), Mg(II) or Cd(II).
- 5. (Original) The method of Claim 4, wherein the multivalent metal cation is Zn(II).
